DATE MAILED: 03/06/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/619,898	Applicant(s) FRANTS ET AL.	
	Examiner Shin-Lin Chen	Art Unit 1632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-40 is/are pending in the application.
 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 1-40 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1632

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, 29-33 and 38, drawn to an isolated nucleic acid encoding an $\alpha 1$ subunit of a P/Q-type gated calcium channel or a specific fragment or derivative or homolog of said calcium channel, a nucleic acid that is at least 70% identical to the sequence of SEQ ID Nos. 1-42, an expression vector comprising said nucleic acid, and a host cell containing said nucleic acid.

Group II, claim(s) 22-25, 27 and 28, drawn to a method of identifying a gene which encodes a P/Q-type gated calcium channel by using the nucleic acid of claim 1 or 20.

Group III, claim(s) 26-28, drawn to a method of distinguishing between alleles of a gene which encodes a P/Q-type gated calcium channel by using the nucleic acid or fragment in claim 20.

Group IV, claim(s) 30-33, 39 and 40, drawn to an animal or a non-human transgenic animal comprising the nucleic acid set forth above.

Group V, claim(s) 34, drawn to a method for screening for an agent for treating FHM, EA-2, SCA6, migraine or other neurological disorder by using animal.

Group VI, claim(s) 35, drawn to a protein or peptide encoded by the nucleic acid of claim 1.

Art Unit: 1632

Group VII, claim(s) 36 and 37, drawn to a natural or synthetic antibody against a protein or peptide according to claim 35, and a method for diagnosing FHM, EA-2, SCA6, migraine or other neurological disorder associated with cation channel dysfunction by using said antibody.

Claims 27 and 28 link to inventions II-III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 4 and 16-18. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also M.E.P.. § 804.01.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature for groups I-VII is an isolated nucleic acid encoding an $\alpha 1$ subunit of a P/Q-type gated calcium channel or a specific fragment or derivative or homolog of said calcium channel, or a nucleic acid that is at least 70% identical to the sequence of SEQ ID Nos. 1-42. Ellis et al., 1995, teaches a nucleotide sequence, N_Geneseq_36 Accession No. Q84659, which is 95.1% identical to base 142 to 244 of

Art Unit: 1632

SEQ ID No. 4, and said nucleotide sequence encodes a human neuronal calcium channel subunit 1A1. Since the nucleotide sequences of SEQ ID Nos. 1-42 are not disclosed in the foreign application Netherlands 96202707.4 filed 9-27-96, therefore, the priority date of said application is not granted. Ophoff, 1996, teaches a nucleotide sequence, GenEmbl Accession No. Z80116, which is 100% identical to the sequence of SEQ ID No. 3, and said nucleotide sequence encodes a P/Q type calcium channel. Thus, no special technical feature has been contributed over the prior art by the instant invention. Further, the methods described in groups II, III, V and VII are drawn to materially distinct methods which differ at least in objectives, method steps, reagents and/or dosages used, schedules used, response variables, and criteria for success. Nucleic acids, proteins, antibodies, and transgenic animals are drawn to compositions having different chemical structure, physical properties and biological function, and they are different products. Therefore, groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1.

Upon election of a group, a further restriction is required as follows:

Since the SEQ ID Nos. 1-42 recited in the claims of the present application represent different DNA sequences having various mixture of exon and intron sequences. They lack common property or activity and the function and utility of the nucleotide sequence of each SEQ ID No would differ from each other, therefore, they represent different products. Thus, the SEQ ID Nos. 1-42 recited in the claims of the present application do not relate to a single general inventive concept. Applicant is required to elect a **single** SEQ ID No. for consideration by examiner.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shin-Lin Chen whose telephone number is (571) 272-0726. The examiner can normally be reached on Monday to Friday from 9:30 am to 6 pm.

Art Unit: 1632

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached on (571) 272-0735. The fax phone number for this group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
